SUBJECT : Georgetown--Seeding of Site of Former 800,000 Gallon
Tank

Pal Arora noted on October 13, 1988 that Boeing or the Airports' contractor is driving heavy trucks over the area we just had seeded. This has probably destroyed the chances of grass growing there. We had notified the Airport we would put in seed in the fall (telcon with Jeff Winter). I feel, and Pal agrees, this is the Airport's responsibility and nothing further is required of City Light in regard to this matter. He is putting a note to this effect in his file, too, per our telcon today.
